

Embedded Hardware Club

Rensselaer Polytechnic Institute

Who we are?

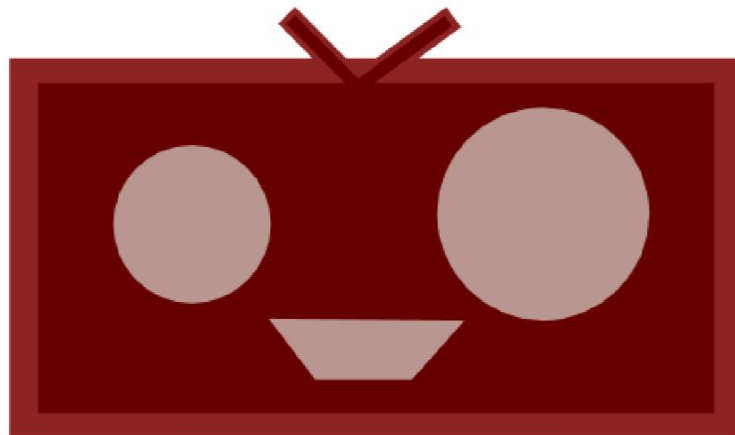

We are a group of students from a variety of majors that all share an interest in electronics and making things.

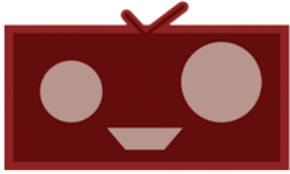

What do we do?

We host workshops and open shop hours. Any student is welcome to come and work on whatever project they want. We have plenty of electronics equipment and know-how.

I want to learn more!

Join our Slack channel! (rpiehc.slack.com) Come to our open shop hours and workshops when you come to RPI in the Fall!
