NACE CAREER READINESS SKILLS

DIGITAL TECHNOLOGY

RPI CCPD - CCPD@RPI.EDU

What do we mean by Digital Technology? Leverage existing digital technologies ethically and efficiently to solve problems, complete tasks, and accomplish goals. The individual demonstrates effective adaptability to new and emerging technologies.

Tips: Employers can assess your Digital Technology Skills through:

- Your technical skills section of your resume. Be sure to indicate what your proficiency level with technical software systems
- Think broadly about your technical skills, not just ones you are familiar with
- Think about how you adapt to changing technology and new methods to doing things- do you consider yourself resourceful? Independent learner? Open to new technologies and ways of completing tasks? These are things employers look for in a behavioral interview You may have a technical interviewing component to a job or internship search

The National Association of Colleges and Employers, through a task force of college career services and HR/staffing professionals, has developed a definition, based on extensive research among employers, and identified eight competencies associated with career readiness.

FAST FACT

Most hiring practices have shifted to be virtual from start to finish. Accordingly, phone interviews will be a primary method for employers to conduct interviews. One of the most difficult parts of a phone interview is conveying automatically add emotion into your voice, demonstrating your energy to employers.
