# Electrical Engineering

*\*This document is for information only – Refer to the Rensselaer catalog (<http://catalog.rpi.edu>) for a complete description of the ELEC program.*

**Electrical Engineering (EE)** is a dynamic and broad field that applies physics and mathematics to the creative design, analysis, research, development, testing and monitoring of diverse systems and products in society today. From cell phones to smart cars, light emitting diodes to autonomous robots, power electronics to power systems, electrical engineering plays an essential role in advancing our multidisciplinary, technological society.

**Key & Related Courses:** Electric Circuits, Introduction to Electronics, Embedded Control, Computer Components and Operations, Signals and Systems, Engineering Probability, Microelectronics Technology, Fields & Waves I, and Electrical Energy Systems

**Focus Areas:** Microelectronics and Photonics; Mixed Signal Electronics; Electric Power and Energy; Communications and Computer Network; Artificial Intelligence and Machine Learning; Computer Vision and Imaging; Control, Robotics, and Automation. See the [ECSE Focus Area page](#) for details.

**Employment and Career Opportunities:** Electrical Engineering graduates with a bachelor's degree provide the backbone for a wide variety of technological fields. From designing sensors for the automotive industry to implementing circuits for defense companies, to creating imaging products in the medical field, electrical engineers enable scientific ideas in many areas of technology. According to Jobweb, a career development website for new college grads, electrical engineering is at the top of the engineering job demand curve at all degree levels, with a very clear lead over other engineering disciplines for M.S. and Ph.D. degrees. In addition, annual average job opportunities are highest for electrical and electronics engineers.

Typically, during the first year or two after a bachelor's degree, the young engineer would get to know the company's products, expectations, and procedures before selecting a technical niche. That niche may include, design, development, implementation, testing, and characterization of various technologies. On the job, hands on experience supplements theory learned in the classroom. For this reason, internships or co-ops before graduation increase chances of early success in this career path. Currently, our students are participating in co-ops with a variety of firms such as IBM, GE Energy, Cisco, Honda, Siemens, Intel, and Hasbro. For more information about co-ops or internships visit the Center for Career and Professional Development website at <https://info.rpi.edu/career-development>.

“A Bachelor of Science degree in engineering with a specialty in electrical engineering may also serve as a starting point for careers in many other fields, ranging from business to law, medicine, and politics, since the problem-solving skills acquired in an electrical engineering program provide an extraordinarily valuable asset. The same skills will equip you to assume leadership roles in your community and in professional circles outside the workplace” (2001 IEEE, Inc.). Management and electrical engineering is becoming a popular combination with a need for technical expertise in leadership. Decision making from a technical point of view is often sought and encouraged in electrical engineers whose aspirations are to lead. The finance industry has also become a primary employer of electrical engineers.

**Undergraduate Research and Graduate School:** Many electrical engineers eventually continue on to graduate school where they further develop their expertise with the goal of leading technology into new and exciting areas of application. Continuing education is needed for a career in research and development. In many cases, M.S. students pursue their degrees with financial assistance from their employers. EE students in doctoral programs can plan on full financial support, which includes tuition and stipends, so such programs are essentially free. Participation in an undergraduate research project (URP) is an excellent way to learn about research and graduate studies.

# Computer and Systems Engineering

*\*This document is for information only – Refer to the Rensselaer catalog (<http://catalog.rpi.edu>) for a complete description of the CSYS program.*

**Computer and Systems Engineering (CSE)** is a dynamic field that creatively applies computers and mathematics to the design, analysis, research, development, testing and implementation of a wide range of systems and products. From secure wireless networks to medical imaging systems, autonomous mobile robots to face recognition security systems, aircraft control systems to mapping the world, distributed underwater pollution sensors to the next generation Internet, handheld games to drones, these systems are built by RPI computer engineers.

**Key & Related Courses:** Electric Circuits, Introduction to Electronics, Embedded Control, Computer Components and Operations, Signals and Systems, Engineering Probability, Computer Architecture, Networks, and Operating Systems, Foundations of Computer Science, and Introduction to Algorithms.

**Focus Areas:** Artificial Intelligence and Machine Learning; Internet of Things; Automatic Control and Robotics; Communications and Information Processing; Computer Vision and Image Processing; Computer Hardware Systems; Mixed Signal Electronics; Computer Networks. See the [ECSE Focus Areas page](#) for details.

**Employment and Career Opportunities:** Computer and Systems Engineering graduates with a bachelor's degree provide the backbone for a wide variety of technological fields and enjoy broad freedoms in choosing the types of projects on which they want to work. In many cases, a computer engineer may decide to focus on building a tool or a product that meets a need they feel passionate about. For example, a computer engineer may develop a new algorithm and medical equipment to help loved ones or help to bring back the enjoyment of music to someone with profound hearing loss. According to Jobweb, a career development website for new college grads, computing and computer engineering are at the top of the engineering job demand curve at all degree levels, especially for M.S. and PhD degrees. Overall, career opportunities in computer and systems engineering remain strong.

Typically, during the first year or two after a bachelor's degree, the young engineer would get to know the company's products, expectations, and procedures before selecting a technical niche. That niche may include, design, development, implementation, testing, and characterization of various software and hardware technologies. On the job, hands on experience supplements theory learned in the classroom. Hence, internships or co-ops before graduation increase chances of early success in this career path. Currently, our students are participating in co-ops with a variety of companies such as IBM, GE Energy, Cisco, Intel, MIT/Lincoln Labs, and Google. For more information about co-ops or internships visit the Center for Career and Professional Development website at <https://info.rpi.edu/career-development>.

Management and computer engineering is becoming a popular combination with a need for technical expertise in leadership. Decision making from a technical point of view is often sought and encouraged in computer engineers whose aspirations are to lead. The finance industry has also become a key employer of CSE grads. Computer and Systems Engineers who go on to graduate school are looking to go beyond seeking solutions to immediate needs, and look to project and steer future technologies through discovery and innovation.

**Undergraduate Research and Graduate School:** In addition to the B.S. degree, the CSE program also offers M.S. and PhD degrees. The M.S. degree can be a terminal degree or used as preparation for PhD. Continuing education is needed for a career in research and development. In many cases, M.S. students pursue their degrees with financial assistance from their employers. CSE students in doctoral programs can plan on full financial support, which includes tuition and stipends so such programs are essentially free. Participation in an undergraduate research project (URP) is an excellent way to learn about research and graduate studies.

# Advising Responsibilities

## Student's responsibilities

- To know their advisor's office hours, email address, and advising schedule.
- To make, and keep, appointments and prepare for registration advising by reviewing the templates, Class-Hour Schedule on SIS, and your Degree Works worksheet. Take with you a copy of your worksheet to the meeting.
- To formulate questions regarding curriculum, course selections, career options, etc. Take with you a list of questions.
- To be aware of their academic and personal needs and to seek assistance when needed. It's OK to ask your advisor for directions.
- To understand that the role of their advisor is to provide information and to advise you, but not to make decisions for you. Our goal is for every student to become an active participant in their education, not only while at Rensselaer but for their life time.

## Advisor

- To be accessible to students throughout the year at posted office hours. If an advisor will be away from campus for an extended period of time, he or she should post the names and office locations of alternate advisors outside their offices, so that students will have other advising resources.
- To set aside designated times for registration advising and individual discussions.
- To be knowledgeable about current curriculum requirements, academic policies and procedures, referrals and resources on campus, and career opportunities in the major field.
- To guide students through academic programs that will complement their personal, educational, and professional interests.

## The Hub

<http://eng.rpi.edu/students/hub>  
[soehub@rpi.edu](mailto:soehub@rpi.edu)

The School of Engineering Advising Hub is the primary source of academic advising for all engineering students during their first two semesters at RPI. The Hub is located in the Ansell lounge on the third floor of the Jonsson Engineering Center (JEC) and is staffed by experienced advisors who will offer academic assistance for all engineering majors. Hub advisors assist students in establishing a foundation for academic success through student responsibility and planning. The Hub is a resource for all advising purposes including:

- Semester course planning
- Clear Student Advising Meeting (SAM) holds
- Major/minor declaration or changes
- Form approvals
- Registrar Protocol
- The Arch planning
- HASS and other course requirements

Beginning with their third semester students will transition to a faculty advisor specific to the student's major. The faculty advisor will then contribute to the student's academic success by offering valuable perspective on internships, research and job prospects in addition to graduation requirements.

The SoE First Year Advising Hub offers advising appointments every week day (no weekends or holidays) from 9am-noon and 1 to 4 pm. Until further notice, meetings will be held via WebEx video chat or by phone.

One-on-one meetings may be booked here: <https://go.oncehub.com/SoEHub>

**ECSE Advising Tasks,  
by Year  
The Purposes for Meeting with Your Advisor**

<u>Time</u>	<u>Visions</u>	<u>Your Roadmap</u>	<u>People to Meet</u>
Entering RPI		Adjust ECSE template/plan for AP credit	Members of the Student Orientation team
First Year	Choosing or changing a major	Exploring your plan and template	Getting to know your Hub Advisor
Second Year	Learning and deciding about Arch, URP's, Internships, Co-op's, and Study Abroad	Adjust plan for overloads, dropped or failed courses, Co-op, and Study Abroad.	Getting to know your faculty advisor and <u>at least one</u> faculty in major
Third Year	Planning 4th year, deciding about work and grad school	Adjust plan for co-op, overloads, dropped or failed courses.	Getting to know other faculty in major
Fourth Year	Creating a vision for career or grad school or both	Preparing applications for job and/or grad school	Asking faculty for recommendations

## **Academic Information and Regulations**

The Institute requires a degree candidate to earn the last 30 credits in courses completed on this campus or through a program formally recognized by the Institute. Transfer courses are limited to two courses or eight credits counting toward the student's last 30 credits and require the approval of the director of the Advising and Learning Assistance Center.

Baccalaureate candidates must have passed all of the prescribed academic work and have satisfied the fee requirements. Candidates must also be in good academic and disciplinary standing. Undergraduate students on probation at the time of completion of course work may be required to meet certain stipulations for removal from probation. However, such requirements may be waived for those students whose cumulative GPAs satisfy the baccalaureate degree requirements. In general, a term's work with grades of not less than C will be required in programs arranged by the Committee on Academic Standing. The director of the Advising and Learning Assistance Center will state requirements to the students in writing.

Degree candidates must be registered during the semester in which they intend to graduate and must file a degree application with the registrar by the dates specified in the academic calendar. Students who previously applied for graduation but did not complete all their requirements on time must submit a new application specifying the new date of graduation.

### **Double Degrees**

A student may become a candidate for a second baccalaureate degree when he or she has completed: (1) the equivalent of at least two terms (30 credit hours) of additional work beyond the requirements of a single degree, and (2) the courses in the department in which the student is registered and such other courses as are required for the second degree. From the ECSE department's perspective, students considering a Double Degree may want to consider a Co-terminal or traditional Master's degree, instead. The ability to obtain a graduate level degree by taking 30 credits beyond the Bachelor's degree should be seriously considered rather than taking 30 additional credits and conferring solely a Bachelor's degree.

### **Dual Majors**

ECSE students sometimes pursue a dual major, usually in a field closely allied with ECSE. For example, CSE majors can add Computer Science as a CSE/CS dual major. Other combinations of majors are also possible – consult the ECSE departmental website for more information. Before deciding on a dual major, meet with your advisor to learn more about it. Dual majors rarely have room in their schedules for Free Electives.

### **Minors**

ECSE majors frequently complete a minor in a field of interest, other than engineering, by using Free Electives and/or the HASS Electives. A minor is a set of courses coherently based on subject, methodology, or other factors. Many departments offer one or more such minors; several of the minors are interdisciplinary. A student wishing to complete a minor should consult with the adviser for that minor before completing the second course in it (departmental secretaries have this information). Minors vary in their requirements from 15 to 21 credit hours. Courses for the minor may not be taken on a Pass/No Credit basis. No more than 50% of the course credits applied to the minor requirement may be drawn from credits applied to the major. Students are not permitted to pursue a minor in their major, concurrently or subsequently. No course which is required for one minor can be used for another minor requirement.

## **Free Electives**

ROTC courses (USAF, USAR, USNA) may apply up to a total of 12 credits to Free Electives.

One credit classes that are graded Satisfactory / Unsatisfactory (S/U) that are not in the School of Engineering may **not** be used as free electives. For example, PHYS-1010 A Passion for Physics is a 1-credit S/U course that will not count as a free elective.

## **Pass/No Credit**

The purpose of the Pass/No Credit option is to allow you to take courses outside of your normal curriculum or minor program which you might otherwise not consider taking because of grade considerations. Please note that the Pass/No Credit option is not available to graduate students or non-matriculated students.

### **Submission procedures and deadlines**

If you wish to take a course with the Pass/No Credit designation, you must file an approved Pass/No Credit Form, with the Registrar's before deadline date specified in the academic calendar. Similarly, if you have elected to take a course on this basis, you must choose to drop the Pass/No Credit designation by filing a Remove Pass/No Credit Designation Form by the same deadline. Please refer to Rensselaer's academic calendar for specific dates by which you must add or remove Pass/No Credit designations.

Undergraduate students may elect to take courses on a Pass or No Credit basis, for which the grade is either "P" (Pass) or "NC" (Fail). In general:

- You may take no more than 12 credit hours of courses designated as Pass/No Credit courses, and no more than six credits of these may be Humanities and Social Sciences courses used to satisfy the requirements of the undergraduate courses in these fields. You cannot use a pass/no credit course in the HASS Integrative Pathway requirement.
- You may not use the Pass/No Credit designation for any courses, which you have previously failed, or for any courses which are specifically required by name or which are required to be chosen from a list of named courses in your curriculum or minor.
- You may not take any courses at the 6000 level on a Pass/No Credit basis.
- Communication Intensive courses cannot be taken as Pass/No Credit. (Effective for students who enter Fall 2010 or later)

## HASS and Professional Development – Policies for Engineering Students

As part of their B.S. degree program, all Rensselaer undergraduates take a selection of HASS courses referred to as the HASS Core.

The HASS Core consists of:

- 24 credits distributed to afford students a breadth of perspective across the various disciplines (See footnotes 1 below).
  - A maximum of 12 credits at the 1000-level can be counted toward the HASS core.
  - A maximum of 8 AP or transfer credits can be counted toward the HASS core. (See footnotes 2, 3, and 5 below)
  - A maximum of 8 credits can be designated as P/NC.
- An approved 12-credit area of focus known as an Integrative Pathway, which is designed to add depth and coherence to the HASS Core, enhance students' majors, and optimize students' degree curriculum. Students can choose from a list of either disciplinary or interdisciplinary Pathways.
  - Courses counting toward the Pathway may not be designated as P/NC.
- One four-credit 4000-level course (See footnote 4 below)
- One HASS Communication Intensive course
  - Students should take their HASS Communication Intensive course during their first three semesters.
  - Students may not use AP, IB, or Cambridge A-level credit, or transfer credit from another university to satisfy the HASS communication intensive (CI) requirement. This applies to all transfer courses, including those taken before entering RPI and those taken after entering RPI (e.g., during break, while studying abroad). There are exceptions to this policy.
  - P/NC designation may not be used to satisfy this requirement.
- One HASS Inquiry course
  - Students should take an Inquiry course during their first year. These courses cultivate a deep appreciation of the ethical and moral imperatives that are the foundation of integrative knowledge that spans the humanities, arts, and social sciences. Students learn the habits of mind that illuminate contemporary global issues from a diversity of perspectives using an interdisciplinary, integrative, and collaborative approach. For a listing of HASS Inquiry courses go to: <https://info.rpi.edu/hass-inquiry>
- Breadth
  - Students should take at least one course from the humanities and one course from the social sciences.
  - Completion of a HASS Inquiry course (typically an IHSS course), in addition to the previously stated HASS Core requirements, satisfies the requirement.

Footnotes:

- 1. Engineering majors must complete 20 credits of HASS courses in addition to the credits earned associated with the three-course sequence of professional development (PD) courses entitled Professional Development-Group Dynamics (either ENGR 1010 or as part of ENGR 2050), Professional Development – Tech Issues and Solutions, and Professional Development-Leadership (ENGR 4010).**
- 2. Transfer credit limit may be waived for transfer students if courses were taken at the previous institution, however, the limit for AP credits still applies.**
- 3. Students who transfer into Rensselaer can satisfy this through a three- or four-credit course at their prior institution or a four-credit course at Rensselaer. Transfer students may apply up to 12 transfer credits toward a pathway. Students entering below sophomore status must follow the same HASS core as students entering via freshmen admission. Students entering at or above sophomore status have two additional pathway options available to them: transfer student social science pathway or transfer student arts and humanities pathway.**
- 4. Students enrolled at Rensselaer who wish to take a HASS course for credit at another accredited institution must obtain prior approval for the course from the HASS Associate Dean for Academic Affairs. Applicants must furnish a catalog description of the proposed course and syllabus, and a**

completed copy of Rensselaer's Transfer Credit Approval Form to the HASS Student Services Hub on the 4th floor of the Sage building or at [HASSInfo@rpi.edu](mailto:HASSInfo@rpi.edu).

Humanities	Code	Social Sciences	Code
Arts	ARTS	Cognitive Science	COGS
Communication	COMM	Economics	ECON
Games and Simulation Arts & Sciences	GSAS	Games and Simulation Arts & Sciences	GSAS
Interdisciplinary Studies	IHSS	Interdisciplinary Studies	IHSS
Languages	LANG	Psychology	PSYC
Literature	LITR	Science and Technology Studies	STSO
Philosophy	PHIL		
Science and Technology Studies	STSO		
Writing	WRIT		

### Students should declare their pathway in SIS

On the Student Menu on SIS under Curriculum Information section choose Select a Pathway Concentration. This can only be done once a semester.

In the new window select your Pathway from the drop-down menu.

Go back to the Student Menu and open Degree Works. Once opened click the Process button (located in the second section below your name and curriculum information). In the top section below your name you will see Concentration and then PW – and your chosen pathway. This may need to be updated overnight.

### THE 2-CREDITS OF Professional Development-Tech Issues and Solutions SHALL BE SATISFIED AS FOLLOWS:

The named course STSO-4100 Professional Development-Tech Issues and Solutions, will satisfy this requirement.

A 4-credit alternate course at either a 2000 or 4000 level can be substituted for the 2-credit STSO-4100 Professional Development Tech Issues and Solutions course. A list of these alternate courses is available on the registrar website.

A course used to satisfy this requirement may not be taken on a Pass/No Credit basis.

In general, the alternate course will be split as follows:

- two credits allocated to satisfy Professional Development Tech Issues and Solutions
- the remaining credits allocated to free elective (or “Not Applied” to the degree if free elective credits have been completed)

With restrictions, the credits of an alternate that are not allocated to Professional Development Tech Issues and Solutions may be used to fulfill the 20-credits of HASS. These credits:

- **cannot** count toward the 4000 requirement,
- **cannot** count toward the Integrative Pathway requirement,

However,

- they can count toward the overall 20 credits of HASS,
- they can count toward the H and SS credit minimums,
- they can count toward the HASS “CI” requirement.

If a student transfers in a course that is in name and course number equivalent to a Professional Development Tech Issues and Solutions alternate, it counts as that named HASS course, but it does not transfer in its status as a Professional Development Tech Issues and Solutions alternate. The student would still be responsible for taking Professional Development Tech Issues and Solutions or an approved alternate at Rensselaer.

In the rare case that a student transfers in a course with Professional Development content nearly identical to that of STSO-4100 Professional Development Tech Issues and Solutions, they may furnish a syllabus of the transfer course and a completed copy of Rensselaer’s Transfer Credit Approval form to the Associate Dean of Engineering to apply for approval. Note that some courses in the Study Abroad program automatically satisfy the Professional Development Tech Issues and Solutions requirement, as indicated in the transfer equivalency guide.

The School of Humanities, Arts, and Social Sciences (HASS) Associate Dean of Academic Affairs is: **Brett Fajen** (fajenb@rpi.edu, Sage 4302)

The Assistant Registrar is: **Kim Herkert** (herkek@rpi.edu, Academy Hall 2713)

The Associate Dean of Engineering is: **Kurt Anderson** (anderk5@rpi.edu, JEC 3018)

## HASS Checklist for Engineers

### What departments are in the School of Humanities, Arts, and Social Sciences (HASS)?

ARTS: Arts and Music	LANG: Language
COGS: Cognitive Science	LITR: Literature
COMM: Communication & Media	PHIL: Philosophy
ECON: Economics	PSYC: Psychology
GSAS: Gaming and Simulation Arts and Sciences	STSO: Science, Technology, and Society – Social Science - Humanities
IHSS: Interdisciplinary HASS	WRIT: Writing

### What are my requirements?

<b>Check off each completed requirement. If all boxes are checked and you haven’t violated the restrictions below, you are done!</b>							
	HASS Inquiry Course: Have you taken a course with an IHSS prefix? <i>Must be taken in your first academic year. You cannot take an IHSS course after your first 2 semesters.</i>						
	Communication Intensive Course: Have you taken a course with the “communication intensive” designation (found in SIS class search on the right side of the screen)? Note: This course can be one you took for your integrative pathway or your inquiry course. <i>Should be taken within your first 3 semesters, no P/NC allowed. CI courses must be taken at Rensselaer.</i>						
	Integrative Pathway a series of 3 courses (12 credits): Pick one pathway from this link ( <a href="https://info.rpi.edu/hass-inquiry">https://info.rpi.edu/hass-inquiry</a> ) and write it here:  You may declare your pathway within SIS so that it appears on your Degree Works report. Keep track of your pathway courses in the boxes below, check each off as it’s completed. This requirement is done when you finish all three courses. <i>No P/NC allowed at any point in your integrative pathway.</i>						
	<table border="1" style="width: 100%;"> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> <tr><td> </td><td> </td></tr> </table>						
	4000-Level Requirement: Have you taken a course at the 4000 level? Note: This course can be one you took for your integrative pathway.						

Credit Requirement: Have you taken 20 total HASS credits - 22 when including Professional Development Tech Issues & Solutions?
--------------------------------------------------------------------------------------------------------------------------------

**What are the restrictions?**

- 1) No more than 3 classes (12 credits) at the 1000 level may be applied towards the HASS core. Anything above 12 credits may be applied to Free Electives.
- 2) No more than 8 credits can be transferred into the HASS core.
- 3) Students may not use AP, IB, or Cambridge A-level credit, or transfer credit from another university to satisfy the HASS communication intensive (CI) requirement.
- 4) No more than 2 courses can be designated as P/NC and those classes may not be part of the Integrative Pathway or the Communications Intensive course.

**The Arch**

<https://info.rpi.edu/the-arch>

The Arch program is a unique approach for student development and growth that prepares students to meet the multifaceted challenges of the 21st century. The Arch will augment academic and experiential programs, and provide an even more robust-and transformative-educational experience for undergraduate students.

Students in the Class of 2026 will be required to participate in The Arch program in summer 2024. There is an [exception process](#) for athletes, ROTC, and a few other select cases.

The Arch is a restructuring of the Rensselaer academic calendar. It creates additional opportunities for experiential learning that complement curricular and co-curricular offerings at Rensselaer.

Rising juniors will attend a full summer semester, between their sophomore and junior years. Juniors then spend a semester away during either the fall or spring semester of their junior year, still only taking 8 semesters to graduate.

This will allow students to take advantage of the numerous experiential learning activities available off campus, including international travel, internships, co-ops, research opportunities, and engagement in community service projects.

**Academic Semester Experience**

YEAR	FALL	SPRING	SUMMER
Freshman	Required	Required	Optional
Sophomore	Required	Required	Required
Junior	*	*	Optional
Senior	Required	Required	Graduate

\* option for an "away" semester

# Electrical Engineering Curriculum Checklist

First Year						
CSCI-1100	Computer Science I	4	OR	ENGR-1200 OR ENGR-1400	Engineering Graphics & CAD <sup>1</sup> OR Engineering Communications <sup>1</sup>	1
ECSE-1010	Introduction to ECSE <sup>6</sup>	4	OR	ENGR-2350	Embedded Control	4
MATH-1010	Calculus I	4	OR	MATH-1020	Calculus II	4
IHSS-####	Hum., Arts or Soc. Sci. Elective <sup>9</sup>	4	OR	PHYS-1100	Physics I	4
					Science Elective	4
Second Year						
ECSE-2610	Computer Comp. & Operations	4	OR	ECSE-2010	Electric Circuits <sup>8</sup>	4
MATH-2400	Intro. to Differential Equations	4	OR	ECSE-2500	Engineering Probability <sup>8</sup>	3
PHYS-1200	Physics II	4	OR	MATH-2010	Multivariable Calc & Matrix Algebra	4
	Hum., Arts or Soc. Sci. Elective	4			Hum., Arts or Soc. Sci. Elective	4
ARCH SEMESTER		Third Year		Fall or Spring		
ECSE-2110	Electrical Energy Systems	3	OR	ECSE-2050	Intro. to Electronics <sup>8</sup>	4
ENGR-2050	Introduction to Eng. Design	4	OR	ECSE-2100	Fields and Waves I <sup>8</sup>	4
STSO-4100	Prof Devt- Tech Issues & Solutions <sup>1,3</sup>	2	OR	ECSE-2410	Signals and Systems <sup>8</sup>	3
	Hum., Arts or Soc. Sci. Elective	4	OR	ECSE-2900	ECSE Enrichment Seminar	1
	Free Elective <sup>2</sup>	3-4			Math/Science Elective <sup>7</sup>	4
Fourth Year						
ECSE-2210	Microelectronics Tech <sup>8</sup>	3			Restricted Elective <sup>1,4,5</sup>	3
ECSE-4900	Multidisc. Capstone Design <sup>1</sup>	3			Free Elective <sup>1,2</sup>	3-4
ENGR-4010	Prof Development - Leadership <sup>1</sup>	1			Free Elective <sup>1,2</sup>	3-4
	Lab Elective <sup>1,4</sup>	3			Free Elective (if needed) <sup>2</sup>	3-4
	Restricted Elective <sup>1,4,5</sup>	3			Hum., Arts or Soc. Sci. Elective	4
	Technical Elective <sup>1,4,5</sup>	3-4				

1 May be taken either term.

2 The free electives must total to at least 12 credits.

3 This course will be fulfilled from a list published at the start of each semester. For a list of courses that satisfy the Professional Development – Technical Issues & Solution requirement refer to the link “Professional Development Courses” on the Registrar’s “Academic Planning” web page. It should be completed before the capstone design course.

4 It is recommended that students use electives to form a focus area. See the ECSE Web page for focus area listings.

5 No more than one Independent Study course may be used to when satisfying the combined Technical and Restricted Elective requirements.

6 May be replaced with ENGR-1100 Introduction to Engineering Analysis

7 Students who wish to take ENGR-1600 Materials Science as their Math/Science Elective must take CHEM-1100.

8 Core courses that are the prerequisites for 4000-level courses, offered in Fall and Spring terms annually. Students should take the courses as soon as their prerequisites are met.

9 A HASS inquiry course must be taken in the first year, suggested that HASS Communication Intensive course be taken in the first three semesters.

## 128 credits minimum

### RESTRICTED ELECTIVE

Any 3 or 4 credit hour course with the designation ECSE-4xxx or ECSE-6xxx.

### MATH/SCIENCE ELECTIVE

A 4-credit-hour course (or a 3-credit-hour course with a 1-credit-hour laboratory) in Science (ASTR, BIOL, CHEM, EARTH, PHYS) or Mathematics (MATH, MATP). An independent Study course cannot be used to satisfy this requirement.

### SCIENCE ELECTIVE

CHEM-1100 Chemistry I  
BIOL-1010/1015 Introduction to Biology/Lab  
BIOL-2120/2125 Cell and Molecular Bio. w/Lab

### TECHNICAL ELECTIVE

Any 3- or 4-credit-hour course in engineering, mathematics, or science at the 4000 level or higher.

### LAB ELECTIVES

ECSE 4090 Mechatronics  
ECSE-4130 Electric Power Eng. Lab  
ECSE-4220 VLSI Design  
ECSE 4660 Internetworking of Things  
ECSE-4760 Real-Time Cntrl & Comm.  
ECSE-4770 Cptr H'ware Design  
ECSE-4790 Microprocessor Systems  
ENGR-4710 Mfg Proc & Systems Lab I

With prior approval, a special topics course (ECSE 496# may be used as a Lab Elective

# Computer and Systems Engineering Curriculum Checklist

First Year						
CSCI-1100	Computer Science I	4		CSCI-1200	Data Structures	4
ECSE-1010	Introduction to ECSE <sup>6</sup>	4		ECSE-2610	Cptr. Comp. & Operations	4
ENGR-1200 OR ENGR-1400	Engineering Graphics & CAD <sup>1</sup> OR Engineering Communications <sup>1</sup>	1		MATH-1020	Calculus II	4
MATH-1010	Calculus I	4		PHYS-1100	Physics I	4
IHSS-####	Hum., Arts or Soc. Sci. Elective <sup>8</sup>	4				
Second Year						
CSCI-2200	Foundations of Comp. Science	4		CSCI-2300	Intro to Algorithms	4
ENGR-2350	Embedded Control	4		ECSE-2010	Electric Circuits <sup>7</sup>	4
MATH-2400	Intro. to Differential Equations	4		MATH-2010	Multivar Calc & Matrix Algebra	4
PHYS-1200	Physics II	4			Hum., Arts or Soc. Sci. Elective	4
Arch Semester		Third Year		Fall or Spring		
ECSE-2660	Cptr Arch, Nets, & Op Sys	4		ECSE-2050	Intro. to Electronics <sup>7</sup>	4
ENGR-2050	Intro. to Engineering Design	4		ECSE-2410	Signals & Systems <sup>7</sup>	3
STSO-4100	Prof Devt- Tech Issues & Solutions <sup>1,3</sup>	2		ECSE-2500	Engineering Probability <sup>7</sup>	3
	Free Elective <sup>2</sup>	3-4		ECSE-2900	Enrichment Seminar	1
	Hum., Arts or Soc. Sci. Elective	4			Hum., Arts or Soc. Sci. Elective	4
Fourth Year						
ECSE-4900	Multidisc. Capstone Design <sup>1</sup>	3			Restricted Elective <sup>1,4,5</sup>	3-4
ENGR-4100	Prof Development - Leadership <sup>1</sup>	1			Science Elective	4
	Computer Eng Elective <sup>1,4</sup>	3-4			Free Elective <sup>2</sup>	3-4
	Restricted Elective <sup>1,4,5</sup>	3-4			Free Elective (if needed) <sup>2</sup>	3-4
	Technical Elective <sup>1,4,5</sup>	3-4			Hum., Arts or Soc. Sci. Elective	4
	Free Elective <sup>2</sup>	3-4				

- 1 May be taken either term.
- 2 The free electives must total at least 12 credits.
- 3 This course will be fulfilled from a list published at the start of each semester. For a list of courses that satisfy the Professional Development – Technical Issues & Solution requirement refer to the link “Professional Development Courses” on the Registrar’s “Academic Planning” web page. It should be completed before the capstone design course.
- 4 It is recommended that students use electives to form a focus area. See the ECSE Web page for focus area listings.
- 5 No more than one Independent Study course may be used when satisfying the combined Technical and Restricted Elective requirements.
- 6 May be replaced with ENGR 1100 Introduction to Engineering Analysis.
- 7 Core courses that are the prerequisites for 4000-level courses, offered in Fall and Spring terms annually. Students should take the courses as soon as their prerequisites are met
8. HASS inquiry course must be taken in the first year, suggested that HASS Communication Intensive course be taken in the first three semesters.

**130 credits minimum**

**RESTRICTED ELECTIVE**

Any 3 or 4 credit hour course with the designation ECSE-4xxx or ECSE-6xxx or CSCI-4xxx or CSCI-6xxx.

**TECHNICAL ELECTIVE**

Any 3- or 4-credit-hour course in engineering, mathematics, or science at the 4000 level or higher.

**SCIENCE ELECTIVE**

BIOL-1010/1015 Introduction to Biology +Lab  
 BIOL-2120 Intro to Cell and Molecular Biology  
 CHEM-1100 Chemistry I

**COMPUTER ENGINEERING ELECTIVES**

ECSE 4660 Internetworking of Things  
 ECSE-4670 Computer Comm. Networks  
 ECSE-4740 Parallel Computing  
 ECSE-4770 Computer Hardware Design  
 ECSE-4790 Microprocessor Systems  
 CSCI-4380 Database Systems  
 CSCI-4440 Software Design & Doc  
 With prior approval, a special topics course (ECSE 496x) may be used as a Computer Engineering Elective

## Focus Areas

Focus Areas are an optional way to form a specialization in an area of ECSE through the courses taken for major electives during senior year. If you complete and declare a Focus Area you will be awarded a certificate upon graduation. You may complete and declare more than one Focus Area, with up to 2 of the 3 courses required counting towards multiple Focus Areas. Special topics courses, 6000-level courses or other relevant courses may be used with prior approval (to begin the approval process, please email Dr. Rama Hamarneh (hamarr@rpi.edu)).

A form will be emailed to senior students to declare their Focus Area during the semester that they are graduating.

### **Focus Areas:**

- Artificial Intelligence and Machine Learning
- Computer Vision and Image Processing
- Communications and Computer Networks
- Control Systems
- Robotics and Automation
- Computer Hardware Systems
- Electric Power and Energy
- Microelectronics and Photonics
- Mixed Signal Electronics

For more information about Focus Areas and classes available for each area, please see the ECSE website: <https://ecse.rpi.edu/academics/undergraduate-programs#concentration>

## Registration

**When:** Registration for the Spring semester generally occurs in early November. Registration for the Summer semester occurs the preceding Spring, usually in early March. Registration for the Fall semester occurs the preceding Spring, usually in early April. Exact dates are included in the [Academic Calendar](#).

**How:** Use the [Student Information System \(SIS\)](#) to register for your courses.

**Where:** There are no assigned rooms for registration. You can register for your classes using any computer with Internet access.

### Time tickets

As a student at Rensselaer, you are issued a "time ticket," which assigns to you a specific window of time during which you may register for the following semester. Your time ticket will be sent to your RPI email address 3 - 4 weeks before registration. In addition to making the registration assignment, this e-mail message notifies you of any existing '**holds**' which may prevent you from registering if you do not resolve them.

<b>School of Engineering</b>	
Freshman	0 - 30
Sophomore	31 - 60
Junior	61 - 95
Senior	96 - 128

Your registration time is assigned based on the number of credit hours you have **earned** as a student. The table to the right shows the range of earned credit hours associated with each class. Please note that classes which are still in progress or courses which have been graded as "incomplete" do *not* count towards earned credits.

### Degree Works

Degree Works is a planning and advising tool, available only to undergraduate students, that allows you to track the progress you are making toward your Bachelor's Degree, develop plans of study, and estimate future GPAs. You can access Degree Works by logging in from the main menu of the [Student Information System \(SIS\)](#).

### Registration FAQs

Q: What do I do if a class I want to register for is full?

A: Meet with the instructor of the course and request to be admitted to the course. If the class is a core/required course every effort will be made to accommodate the request. If this is an elective course you may be asked to take it in a subsequent semester. Note that for Core Engineering courses (ENGR prefix) there will be an electronic waitlist available at the time of registration which is capped at ten students per section.

Q: How do I add/drop a course?

A: You may use the [Student Information System \(SIS\)](#) to add or drop courses. Generally speaking, from the beginning of the semester, you will have **two weeks to add** courses and **eight weeks to drop** them. Please refer to the Academic Calendar for specific add and drop deadline dates. Meet with your advisor about the changes you want to make.

If you wish to petition to add or drop classes after the published deadline, you may do so using a [Late Add/Drop Form](#). Please note that after getting the instructors signature (if required), the form must also be approved by the Advising and Learning Assistance Center.

## **Undergraduate Research Program (URP)**

<http://info.rpi.edu/undergraduate-research>

Rensselaer has a very strong Undergraduate Research Program. This is a program that allows students to work in a professor's laboratory for credit or cash. On average, we have 30% of the class taking advantage of these opportunities during their Rensselaer career.

The program offers many advantages and the opportunity to:

- work on a project whose impact could be worldwide and can lead to patents and/or grants
- apply knowledge gained in the classroom to actual problems and research situations
- network with faculty beyond the classroom, opening the door to other opportunities
- gain critical leadership, team-building and critical thinking skills
- publish as an undergraduate
- receive course credit in a more dynamic way or supplement your income

### **How to find a project**

Most URP projects are found through direct contact with the faculty member supervising the research. Most undergraduates find projects from faculty members from whom they have taken classes. A good place to start your search is to determine a faculty member with whom you may want to work on a project. Check the Research Areas page below to determine their field of research. If it sounds interesting, approach them about a possible URP project.

### **What if I have my own idea for a project?**

You may work with a faculty member on an existing research project or on a project based on your own ideas. If you want to pursue your own project, find a faculty advisor who may be interested in your topic since you will be required to have a project advisor.

### **For credit or funding?**

You can earn from one to four credit hours in a semester for your participation in the URP. The number of credit hours you earn is determined between you and your faculty sponsor. If you choose this option you and your faculty sponsor need to:

- Determine how many credit hours you will earn
- Decide exactly what is expected of you, such as your time commitment, the type of work to be submitted, etc.
- Agree on how your grade will be determined

Students may also participate in the URP for pay. URP funding typically comes from two sources:

- Your sponsoring faculty member or department, and/or
- The Office of Undergraduate Education

The faculty sponsor or department is responsible for the financial support of your research. In addition, the Office of Undergraduate Education provides a matching fund.

Most projects expect eight to twelve hours of work per week.

The URP application must be completed electronically and submitted to the departmental Administrative Assistant who:

- Checks the URP Application for completeness
- Fills out your payroll paperwork
- Forwards your application and payroll paperwork to the Office of Undergraduate Education for approval
- Will set up a schedule for reporting your hours. You must submit your hours to the Department Coordinator within the same payroll period that you worked. Please keep in mind that if you work and submit hours that exceed your funding allotment, you will not be paid for those hours. Pay checks are issued every other Friday

### **With whom can I work?**

You can certainly work with any professor who agrees to have you as a part of the research team. However, you may have a more exciting experience if you are working in an area of interest to you. The following page has the research areas of our department listed as well as faculty names for each area. Note that some faculty are listed in more than one area.

You should talk to each of your course professors about their research and about you becoming a part of their team. Do not be shy. Ask about a position. If you do not ask, the answer will certainly be 'No'.

## **Research Areas**

### ***Information Science and Systems***

Tianyi Chen, Randolph Franklin, Qiang Ji, Richard Radke, Ali Tajer, Meng Wang, Birsen Yazici

### ***Communications and Networking***

Hussein Abouzeid, Koushik Kar, Kyle Wilt

### ***Computer Systems Design***

Tong Zhang, Russ Kraft, Liu Liu

### ***Control and Autonomy***

Agung Julius, Junichi Kanai, Santiago Paternain, John Wen

### ***Electronics and Photonics:***

Ishwara Bhat, Mona Hella, Rena Huang, Robert Karlicek, James Lu, Dylan Rees, Shayla Sawyer, Fred Schubert, Michael Shur, Alex Patterson

### ***Energy and Power***

Joe Chow, Paul Chow, Prabhakar Neti, Jian Sun, Luigi Vanfretti

## **International Study**

International Study, or Semester Abroad as it is sometimes called, is coordinated by the Office of International Programs (OIP), located in 4103 Walker Lab. For general information about International Study visit the OIP web site:

<http://info.rpi.edu/international-programs>

ECSE students who choose to participate in International Study should do so during the Junior year (5<sup>th</sup> or 6<sup>th</sup> semester). This means that the decision to study abroad should be made during the 4<sup>th</sup> semester of study so that a plan for the entire junior year can be made with the guidance of the student's advisor. (For students with a substantial number of AP credits this may be the 3<sup>rd</sup> chronological semester.) Consultation Week in March is a good time to talk with your advisor about planning for International Study.

Students may also participate in a year-long fellowship program known as the Congress Bundestag Youth Exchange (CBYX) which offers the opportunity for intensive German language instruction, a semester of coursework at a German University, and a five-month internship placement in Germany. Participation in this program may delay graduation by a semester but the internship and language instruction will more than compensate for the delay.

## **Graduate School**

The ECSE Department currently offers the MS, MEng, and PhD degrees in Electrical Engineering and in Computer and Systems Engineering. Students who wish to continue their studies beyond the B.S. degree should have a very good academic record and begin planning the application process in the 5<sup>th</sup> semester.

For more information about our graduate school, see the graduate school sections of the Institute catalog, as well as the ECSE Department web site. Also ask your advisor about grad school opportunities.

Students frequently think they cannot possibly afford graduate school. But the road to a PhD is essentially toll free. Most students are granted tuition waivers, in addition to receiving an assistantship stipend for living expenses. Students can graduate with a PhD without having added to their debt load.

If you are a very good student, consider applying to graduate school. It is easier to go directly from undergraduate studies to grad school than to wait for several years before enrolling.

## **Co-Terminal B.S.-M.S. Degrees: An Honors Program**

ECSE students who have achieved exceptionally high grades in the first three years are invited to apply to the Co-Terminal Honors Program. The Co-Terminal Program allows Rensselaer undergraduates to complete their Bachelor's degree within eight semesters (ten for B. Arch students), while maintaining their Rensselaer financial aid for up to an additional two semesters of graduate study. Students can apply to most Master's Programs that Rensselaer offers, following the same curriculum as those who entered through the traditional route. Some applicants choose to pursue a Master's degree in the same academic discipline, while others take a more interdisciplinary approach, applying to a graduate program outside of their undergraduate department. Students must apply before the end of the first semester of their senior year, but it is strongly recommended that students begin talking with the undergraduate advisor by their sophomore or junior year.

For more information, pay a visit to the Graduate Admission administrator and pick up a Co-terminal information packet.

## **B.S. – Ph.D. Program**

The ECSE department offers a B.S.-Ph.D. program for ECSE undergraduate students with a passion for research. In this unique program, students are able to conduct research during their undergraduate studies, and begin their Ph.D. immediately after receiving their B.S. degree. As admitted B.S.-Ph.D. students transition to graduate status, they will participate in graduate program seminars and activities. For more information, visit the ECSE website:

<https://ecse.rpi.edu/academics/graduate-programs/bs-phd-program>

## Frequently Asked ECSE Questions

**Q: Do I have to repeat a required course in my major if I get a D in it?**

A: No. A grade of D or D+ in any undergraduate course is considered passing.

**Q: Can I take one of my Restricted or Technical Electives on a P/NC basis?**

A: No. The P/NC option is only for Free Electives and up to two non-depth, non-Communication Intensive HASS courses.

**Q: Can I undo a P grade?**

A: Maybe. But you need to notify the Registrar's Office in writing by Friday of the 13<sup>th</sup> week of the semester in which you elected to use P/NC. However, once the P grade is on your transcript it is generally considered to be a permanent grade.

**Q: I am a dual major and have two advisors. Do I need to meet with both of them before I can register for classes?**

A: Yes. You will need to be cleared or 'SAM-ed' by each of your academic advisors before you can register.

**Q: But my roommate is a dual major, too, and she only has one advisor. Why do I need two?**

A: When the two majors, such as EE and CSE, are in the same department a single advisor can reasonably be expected to know both curricula. But with disparate majors, ECON and EE for example, it is best to have an advisor from each field of study.

**Q: What if I am on co-op or study abroad when registration starts? How can I possibly meet with my advisor?**

A: You should schedule an electronic meeting with your adviser in these circumstances. Reach out to your adviser via email to schedule a meeting to discuss your registration and plan of study.

**Q: I don't know who my advisor is. How can I find out?**

A: You may check who your current adviser is by logging into SIS. Under the student menu, under Curriculum Information, click on "View my Adviser and Curriculum Information." Select the term you are looking for. Your advisor's name will be listed in the row titled Primary Adviser.

**Q: My Degree Works is messed up. I've heard that I won't be able to graduate. What do I do?**

A: First, be assured that your graduation status is determined by at least two human beings. Degree Works is a tool to help plan and monitor academic progress. It does not decide who can graduate. Second, print a copy of your current report and, using a pencil/pen, tidy up the report and show the edited version to your advisor. If your advisor agrees with your redacting, he/she can email the Registrar's Office and have the changes made. You can also email our Undergraduate Student Coordinator, Rama Hamarneh ([hamarr@rpi.edu](mailto:hamarr@rpi.edu)) and she can add a note to your Degree Works indicating how the credits should be applied.

**Q: I just began my senior year. How can I tell if I will graduate on time?**

A: Meet with your advisor. They will help you assess your progress and plan for your last semester.

**Q: Do I really have to take CompSci I (CSCI-1100)? I read the syllabus and I think I know it all already.**

A: Some students do skip CompSci I and take the following course, Data Structures (CSCI-1200). However, you will have to replace the credits for CompSci I. For CSE majors and CSE/CS dual majors the replacement course must be another CSCI course. For EE majors, the replacement can be any technical course (Science or Engineering).

**Q: Can I use VLSI Design both as my Lab Elective and as a Restricted Elective?**

A: No. One course can satisfy only one requirement.

**Q: I want to take a course at a college near my home during the summer. How do I get it to transfer?**

A: First, go to the RPI Transfer Course Guide

[http://sis.rpi.edu/rss/yhwwkwags.P\\_Web\\_Artic\\_Guide](http://sis.rpi.edu/rss/yhwwkwags.P_Web_Artic_Guide). Then follow the given directions.

**Q: I took Calculus I at another university but it is only 3 credits and RPI's Calc I is 4 credits. Do I have to make up one credit of calculus?**

A: No. But you will have to complete the proper number of total math credits. This may mean choosing a 4-credit course to satisfy a 3-credit requirement later on. For transferred 3-credit HASS courses you will need to complete the credit requirements of the HASS Core. Email our Undergraduate Student Coordinator, Rama Hamarneh ([hamarr@rpi.edu](mailto:hamarr@rpi.edu)) to discuss a plan to complete your Core credits.

**Q: How many courses can I transfer into Rensselaer?**

A: If you entered Rensselaer as a first year student, you may transfer up to 32 credits. AP credits are considered as transfer credits. Therefore, if you have 5 AP courses (20 credits) you may transfer an additional 12 credits to Rensselaer through summer study. You are further restricted to a maximum 8 transferred and AP credits of HASS.

**Q: But I want to study abroad and I have 6 AP courses already. Does that mean I can only take 8 credits abroad?**

A: No. Courses taken at affiliated institutions are considered as courses taken at Rensselaer. For a list of affiliated institutions go to the Office of International Programs

<https://info.rpi.edu/international-programs>

**Q: I transferred a 3-credit HASS or Science Elective course, what should I do now?**

A: HASS and Science Elective courses are 4-credits. Reach out to your faculty adviser or Rama Hamarneh to discuss possible ways to make up the 1-credit deficit. Usually, this involves taking a 1-credit class in HASS or School of Science, or using 1 credit of a HASS or Science Free Elective towards the credit deficit. In this situation, you should always make sure to consult with Rama Hamarneh and have a note entered on your Degree Works with departmental approval for the credit substitution.

**Q: I passed but got a low grade in course X. Should I retake it (e.g., to improve my GPA)?**

A: Whether or not you should retake a course depends strongly on your motivations and your post-graduation plans. You should discuss this with your faculty adviser or with Rama Hamarneh to find what the best path is for you.
