Registration deadline: April 23

Register for this session of our Virtual Group Chat Series

that will cover how best to prepare and ace the coding

assessment and technical

interview. Gain insights from evaluators and recruiters to see

what they look for in the application process.

Our Virtual Group Chat Series offers an

interactive way to learn and hear directly from software engineers, and

recruiters. We will cover a range of topics to help you explore our tech

opportunities as well as help you prepare for the upcoming recruiting process.

This is your chance to learn more and get your questions answered.

ENGINEERS,
RESTON, VIRGINIA. DEADLINE: ASAP

NACE CAREER READINESS SKILLS

ORAL & WRITTEN COMMUNICATION

RPI CCPD - CCPD@RPI.EDU

What do we mean by Oral and Written Communication?

Articulate thoughts and ideas clearly and effectively in written and oral forms to persons inside and outside of the organization. The individual has public speaking skills; is able to express ideas to others; and can write/edit memos, letters, and complex technical reports clearly and effectively.

Tips:

- Care about your resume and cover letter – employers often use these as a “writing sample”
- Technical writing is an important skill – bring it up in interviews or highlight on application materials
- E-Mail Etiquette is an indicator of oral and written communication, think about: Do you have an e-mail signature? Is your e-mail error free? Are you sending e-mails to employers within business hours? Did you spell the contacts name correctly?
- Make sure your voicemail is a personalized greeting, always cleared out, and that you answer every phone call with polite tone

The National Association of Colleges and Employers, through a task force of college career services and HR/staffing professionals, has developed a definition, based on extensive research among employers, and identified eight competencies associated with career readiness.

FAST FACTS

Career paths for today's students are not linear. Jobs available to new graduates can lead to very different jobs within a few years. Some of today's jobs might become automated in a few years with no more demand for employees, or they may lead to better opportunities as a career field expands.

-Talking to a career counselor about transferable skills and how to get them can be helpful as graduates look for positions now and in the future. Finding an internship or co-op can be challenging, but don't put all of your eggs in one basket!

In your years at RPI and while searching for an internship or co-op, consider adding the following to your to-do list.

- Volunteer to work on side projects relating to what you are studying at college
- Take advantage of many (free) online resources to build your resume with certificates or courses
- Stay involved on and off campus by joining a club or two. This will also help you grow your personal and professional network. Clubs do not have to be related to your major!

Online Digital Job Search Resources

Glassdoor:

Not only does Glassdoor offer job listings, they provide company reviews, salary reports, interview questions, benefit reviews—all reported by employees themselves. This is a great resource to use when you are searching for a job, preparing for an interview, or preparing to negotiate your salary!
