Bangalore

WHO WE ARE

ScaleFlux is the pioneer in deploying Computational Storage at scale. Computational Storage is the foundation for modern data center infrastructure that provides responsive performance, affordable scaling, and an agile platform for data-driven, compute and storage I/O intensive applications. Founded in 2014, ScaleFlux is a fast-growing startup with a team proven to deploy complex computing and solid-state storage solutions in volume, especially strategically backed up by SK, Micron, Kioxia, and Xilinx, among others. WORK SITES

San Jose, Beijing, Shanghai, Hangzhou

JOBS

HW:
- ASIC Design & Verification Engineer
- ASIC Validation Engineer
- Hardware Engineer

SW:
- Firmware Engineer
- Software System Engineer
- Device Driver Engineer
- Embedded software Engineer

QA:
- Test Engineer
- Test Development Engineer
- Automation Development Engineer

SUPPORT:
- Sales Engineer
- Escalation Engineer
