Undergraduate Research Positions Available

The Intelligent Systems Lab is looking for undergraduate students for this Fall research in computer vision and deep learning.
We are looking for highly motivated and dedicated students with excellent academic record, strong programming skills and solid mathematical background. Prior experience or courses in deep learning and computer vision is a plus.

Student is expected to work at least 10 hours a week during the Fall.
The student will work remotely and will have access to the lab's computers, servers and software. The student will meet with his/her mentor online and submit a report biweekly.

Interested students, please submit your resume and a copy of your transcript to Prof. Qiang Ji at
jiq@rpi.edu
