

I have an opening for 6-8 undergraduates seeking to participate in the URP program. All of the work can be done remotely, and students can start as soon as their URP application is approved this summer. The position is open to sophomores, juniors and seniors in any discipline.

The project is to develop a map of education and workforce development assets for the Mid-Atlantic Region in the area of robotics for manufacturing. The work will involve internet searching initially, followed by surveying prospective employers using a telephone interview to better understand their workforce needs in robotics for manufacturing. (The survey instrument is currently under review, and will be available after approval.) Students will be trained how to conduct the research and the interviews, and how to record their data in a database that is being constructed for this purpose. This is a paid position.

Interested students should contact Glenn Saunders ([saundg@rpi.edu](mailto:saundg@rpi.edu) – cell: 518-932-3745) for more information.

*Would you be so kind as to notify your students of this opportunity?*

Thank you,

Glenn Saunders
